

CYLINDER SLEEVES

ADDED PROTECTION. ADDED DURABILITY.

PROTECTING YOUR VALUABLE ASSETS

Reduce the wear and tear on your SCBA breathing air cylinders by adding a new level of protection. Cylinder sleeves can help protect from dents, gouges, and other physical damage commonly attributed to fireground and industrial applications, not to mention they are a great accessory for training environments.

Constructed of a specially compounded fire retardant grade of clear, high durometer, PVC/Plastisol, these protective sleeves are easy to use and install over the cylinder, forming a watertight seal and protective barrier. Best of all, they are NIOSH/NFPA approved as an accessory to the respirator, so you need not worry about voiding regulatory approvals.

Why suffer unnecessary cylinder replacement costs? Protect your investment early to minimize out-of-pocket maintenance costs due to damage.
